CURRICCULUM- GENERAL PEST MANAGEMENT TECHNICIAN

Sr. no	Subject	Theory Hrs	Practical Hrs	OJT (Mand)	Total Hrs
1	**Introduction to Pest Control** - Introduction to different types of insect, non-insect pests, and vectors - Economic and Health importance of different types of pests - Describe basic pest control methods: prevention, biological, non-chemical and chemical; integrated approaches - 4 D formula. - Safe handling of pesticides - Appropriate use of pest management equipment, calibration and its maintenance (P) - Use of PPE and First Aid during treatment (P) - Measuring, mixing and application (P) - Identification of different insect and non-insect pest samples (P)	4 3 3 3	7 7 7 8	1 1 1	4 3 3 3 8 8 8 8
		13	29	3	45
2	**Cockroach Management** - Introduction and identification to different types of cockroach species commonly found - Inspection based on Habits and Habitats in Residences, Restaurants, Industrial and commercial kitchens - Various Treatment methods including chemical, physical, mechanical, and monitoring for cockroach management - Dos and Don'ts - for the customer and for the Technician - Identification of different types of cockroach samples (P) - Inspection in Residences, Restaurants, Industrial and commercial kitchens (P) - Treatment procedures of cockroach management (P)	3 3 3 2	4 12 12	2 2 2	
		11	28	6	45
3	**Rodent Management** - Introduction and identification to different types of rodent species commonly found - Economic and Health importance of different types of rodents - Various Treatment methods including chemical, physical, mechanical, and monitoring for rodent management	3 3 3			

	- Dos and Don’ts - for the customer and for the Technician - Identification of different types of rodents (P) - Identification of rodent droppings, and other tell-tale signs of infestation (P) - Rodent bait station/ trap installation plan, monitoring and their documentation. (P) - Rodent bait preparation and application (P) - Documentation of rodent station monitoring (P)	3	3 2 2 6 2	1 1 1	
		12	15	3	30
4	**Termite Management** - Introduction and Differentiation between subterranean termite, drywood termite and wood borer damage - Economic importance of termites and wood borer - Pre-construction anti termite treatment method for managing termites in structures (IS 6313 Part 1 and 2) - Post-construction anti termite treatment method for managing termites in structures (IS 6313 Part 3) - Dos and Don’ts - for the customer and for the Technician - Understanding repellent and non-repellent termiticides in Anti-termite treatment - Identification of different castes of termites (P) - Identification of difference in damage caused by various wood-destroying pests (P) - Inspection of a structures for conducting termite management treatment (P) - Drilling, chemical purging, sealing of drilled hole in existing building (P) - Measurement and calculation of areas and chemical usage for conducting treatment (P)	2 2 4 4 1 1	4 4 2 5 4	6 6	
		14	19	12	45
5	**Bed Bug Management** - Introduction to bed bugs and their impact on health - Inspection – Signs and symptoms of infestation - Chemical and non-chemical methods in Bed Bug Management - Dos and Don’ts in Bed Bug Management - Inspection of bed Bug infested site (P) - Plan and execute the Treatment (P) - Monitoring and Follow-up of the treatment (P)	3 3 3 1	5 7 5	1 1 1	
		10.	17	3	30

6	**Minor Pest Management** - Introduction to minor Pests and their impact on structure and health - Identification of minor pest - Ticks, Mites, Spiders, Ants, Fleas, Wasps, Sucking lice, Centipedes, millipedes etc- - Different Management practices of above pests chemical and non-chemical methods	4 6	20		
		10	20		30
7	**Fly Management** - Identification of various flies - Economic and Health importance of different types of flies - Various Chemical and non-chemical methods used for fly management - Various trapping methods - Sampling method and estimation of the trapped flies on the ILTs - Identification of various flies (P) - Conducting survey for breeding sites (P) - Using various traps (P) - Treatment against various flies (P) - Counting / measuring the trapped flies (P)	2 2 4 4 2	3 3 1 5 1	2 1	
		14	13	3	30
8	**Mosquito Management** - Identification of various mosquito types - Economic and Health importance of different mosquitoes - Mosquito inspection, identification, and breeding habitats - Prevention strategies for mosquito management - Chemical and non-chemical measures for mosquito management - Treatment of larval and adult stages - Type and maintenance of equipment used in mosquito management (P) - Mapping breeding sites (P) - Identification of various mosquito types (P) - Using Dip method taking larval sample (P) - Indoor Residual Spraying (IRS), Outdoor Residual Spraying (ORS), Fogging (Thermal and Cold fogging) (P)	3 2 3 2 2 2	3 3 2 2 3	6 6 6	
		14	13	18	45
9	**Bird Management**				

	- Identification of various bird pests - Economic and Health importance of different types of birds - Bird inspection, identification, and breeding habitats - Physical, Mechanical, Chemical and non-chemical measures for bird management - Inspection of roosting and nesting sites (P) - Identification of various bird pests (P) - Installation of bird proofing Nets, Deterrents, Acoustic Devices, Spikes (P)	2 2 4 6	3 3 7	1 1 1	
		14	13	3	30
10	**Weed Management** - Identification of various weeds - Economic and Health importance of different types of weeds - Physical, Mechanical, Chemical and non-chemical measures for weed management - Inspection and Identification of various weeds (P) - Herbicide application for management of weeds (P)	4 2 6	7 8	1 2	
		12	15	3	30
11	**Safety in Pest Management** - Importance of Safety in Pest Control - Personal Protective Equipment - Safe Chemical Handling Practices(P) - Pest Control safety in Residences (P) - Pest Control Safety in Industrial Premises (P) - Pest Control Safety in Commercial Premises (P) - Personal Safety in Hazardous areas (P) - Working at Heights (P) - Emergency procedures during Pest Control (P) - Environmental Safety Considerations	1 1 1 1 1 1 1 1 1 1	1 1 1 1 1 1 1	2 2 1 2 2 2 1 1	1 3 4 3 4 4 4 3 3 1
		10	7	13	30
12	**Employability Skills** - Introduction to Employability Skills - Constitutional values - Citizenship - Becoming a Professional in the 21st Century - Basic English Skills - Communication Skills Duration: - Diversity & Inclusion Duration: - Financial and Legal Literacy Duration: - Essential Digital Skills Duration: - Entrepreneurship Duration:	1 1 1 1 1 1 2 1 4	1 2 2 2	3	

	- Customer Service Duration: - Getting ready for apprenticeship & Jobs	2 1	2 2		
		16	11	3	30
