1 Introduction

This is a procedure manual for the training partner, trainer, assessor, and master trainer for engaging with NIRDPR as an Assessment Agency (AA) and Awarding Body (AB) for various quality control services for eight skill qualifications in the Pest Management sector and are aligned with National Skill Qualification Framework (NSQF). The qualifications with their National Qualification Register (NQR) codes, NSQF levels and Common Norm Notification (CNN) cost category are listed below:

1.1 Skill qualifications under Pest Management sector to be awarded by NIRDPR

Sl.	Qualification	NQR code	NSQF level	NSQF CNN cost category	Duration
1.	General Pest Management Technician	NIRDPR/SPM/QGPMT /2020	3	II	270 hrs.
2.	General Pest Management Supervisor	NIRDPR/SPM/QGPMS/ 2020	4	II	341 hrs.
3.	General Pest Management Manager	2020/AGR/NIRDPR/038 69	5	II	417 hrs.

7.	Fumigation Technician	2020/AGR/NIRDPR/038 68	3	II	200 hrs.
8.	Fumigation Supervisor	2020/AGR/NIRDPR/038 67	4	II	200 hrs.

Note: Details of the qualifications are available at https://www.nqr.gov.in/

1.2 Stakeholder agencies and their roles

There are four primary stakeholder agencies involved in the process of skilling and employment for these qualifications. They are as follows:

i. Funding agency: The agency funds for the skill training. They could be government skilling schemes/programmes, central and state ministry or department, private skilling initiatives, private funding, Corporate Social Responsibilities (CSRs), Community Based Organization, Philanthropic fund, self-funding by training partner, fee from trainees, etc.

ii. Training partner: The agency conducts skill training. The training partner may have to follow the deliverable terms and conditions of the funding agency. Training partner may fund the training also. However, in no case training partner can violate NIRDPR norms to obtain a nationally recognized NSQF certificate.

iii. Employer of skilled candidates: The agency employs trained candidates. The norm of employment depends upon the deliverables of funding agency.

iv. Awarding Body cum Assessment Agency: In this case it is NIRDPR that conducts training of the trainer, affiliates the training partner, accredits the training centre, issues the training materials, conducts the assessment of trainees, and certifies the qualified trainees.

Funding agency, training partner, and employer of the skilled candidates could be the same or different agency. However, they cannot become Awarding Body (AB) or Assessment Agency (AA) and vice versa. A clear ring fencing arrangement shall be maintained between AB cum AA and other agencies as portrayed in the figure 1 below:

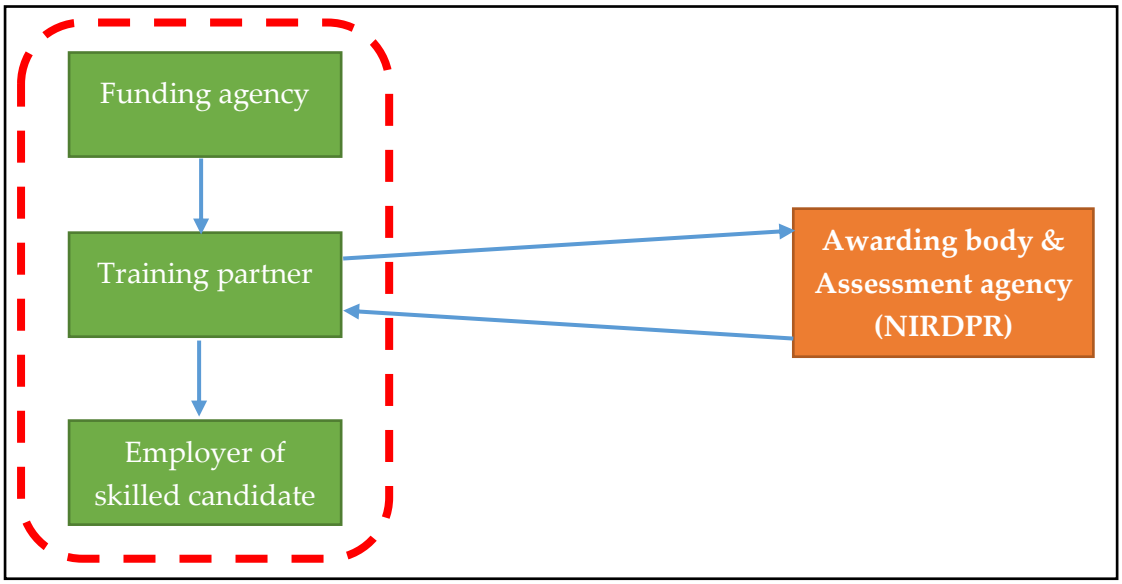

Figure 1: Stakeholders and their ring fencing

1.3 Mode of training

Training on the qualifications can be undertaken through the following modes:

i. Entry level skilling: This involves imparting skill training to the candidates, who would like to enter into the employment market. Training can be undertaken by the training partner for the full duration as stipulated in the qualification file available at https://www.nqr.gov.in/.

ii. Upskilling: Once an entry level skilled worker is ready to move to the next NSQF level, they require higher order skills to perform the job at that level. A training partner undertaking skill training for the upgradation of skills to the entry level worker is known as upskilling. Upskilling has to be conducted for the full duration as stipulated in the qualification file.

iii. Reskilling: The nature of work to be performed by the workers at each job level tends to change frequently. These changes require additional skills set in the existing workers for performing the work in the same job role. When a training partner conducts training on the required occupational standard(s)/topic(s), it is known as reskilling. The duration of reskilling may vary based on the requirement of the employer up to the maximum duration as stipulated in the qualification file. Training partner should decide the duration of reskilling in consultation with NIRDPR.

iv. On the Job Training (OJT): This is a mode of training where training partner provides real time hands-on employment exposure to the trainees at the industry. This mode of training could be conducted either standalone or may be embedded in the entry level training/upskilling/reskilling.

v. Industry internship/apprenticeship: This mode of training is conducted at the workplace where the trainee joins the employer from the beginning and learns by "observing and doing" with the assistance of their mentor/supervisor. For details about this mode of training visit: https://www.apprenticeship.gov.in/Material/NAPS_Guidelines.pdf, https://nsdcindia.org/apprenticeship, https://apprenticeshipindia.org/

vi. Recognition of Prior Learning: This mode of training is primarily to recognize the existing workers in the industry through assessment and certification. The industry shall indent for assessment and certification to NIRDPR. Workers shall be assessed and the successfully qualified workers shall be certified. The industry shall impart reskilling for the candidates, who could not qualify in the assessment.

1.4 Activities to be carried out by NIRDPR as an Assessment Agency cum Awarding Body

Following are the activities that NIRDPR shall carry out for the training partner:

i. Training of trainer: Trainer providing training on the skill qualifications listed in this document must be trained and certified by NIRDPR. Training partner shall either appoint NIRDPR certified trainer or send their trainer to NIRDPR for training and certification. The detailed procedure is laid out at section 3 of this manual.

ii. Affiliation of training partner: Training partner, who would like to conduct training in the mode of On the Job Training (OJT), apprenticeship, industry internship training, and Recognition of Prior Learning (RPL) should affiliate their organization with NIRDPR. The detailed procedure is laid out at section 5.1 of this manual.

iii. Accreditation of training centre: Accreditation is applicable for the training centre, where skill training and/or Recognition of Prior Learning (RPL) is to be conducted. Affiliated training partners who would like to conduct skill training other than On the Job Training (OJT), apprenticeship, industry internship training, and Recognition of Prior Learning (RPL) shall have to accredit the training centre separately. Centres that would like to conduct training on the skill qualifications listed in this manual shall obtain their accreditation from NIRDPR. The detailed procedure is laid out at section 5.2 of this manual.

iv. Issue training materials: NIRDPR prepares various standard training materials that are needed to conduct industry relevant training from time to time. The training partner should procure them on receipt of intimation from NIRDPR. At present, trainee handbook for each of the qualifications are readily available that should be procured by the training partner. The detailed procedure of procurement is laid out at section 6 of this manual.

v. Assessment and certification of trainee: Candidate trained under any of the qualifications listed in this manual must be assessed and certified by NIRDPR only. Training partner shall follow the procedures laid out at 7 for the details.

1.5 Manual mapping

This procedures manual contains seven broad sections. The critical sections are divided into Process and Relevant Documents (RDs) that are required to carry out the process. The process is described at the beginning of the section, followed by the RDs that are detailed at the end of each process.

Section one is an introduction to the skill qualifications of the Pest Management sector. It has a list of qualifications aligned with NSQF with their NQR codes, levels, CNN cost category, duration in subsection 1.1; the roles of various stakeholder agencies are listed at subsection 1.2; Subsection 1.3 is about various modes of skill training that can be implemented by the training partner; 1.4 is on the activities that are to be carried out by NIRDPR for the training partner. This section 1.5, is on the design of this manual. Section two is on master trainer onboarding by NIRDPR to provide and ensure various quality services towards the training partner and trainee. Training of trainer and training of the assessor are delineated at section 3 and 4 respectively. Section 5 is divided into two subsections, subsection 5.1 is on affiliation of training partner and 5.2 is on the accreditation of training centre. As a quality assurance and controlling agency, NIRDPR has prepared trainee handbook for each of the qualifications that are to be distributed to the trainee. The process of obtaining these handbooks is detailed at section 6. The last section, i.e. seven has dealt with the procedure for assessment and certification of trainee.

2 Onboarding of Master trainer

Purpose: The role of the Master trainer is the most crucial one in the entire skill training ecosystem. They ensure overall quality by playing various roles under the awarding body.
